I am a BCA 7th-semester student from Kathmandu who started with a strong focus on Java and Spring Boot backend development — and has since broadened into full-stack. Recognising the direction of Nepal's IT industry, I am actively shifting toward a modern stack: Python, React, and AI integration, while keeping my Java/Spring Boot foundation solid. My goal is to become a well-rounded full-stack developer who can build end-to-end products and work with AI-powered features. I am seeking an internship — frontend, backend, full stack, or any IT role — where I can get real hands-on experience, contribute to a real team, and understand how the industry actually works in Nepal.

PROJECTS

Online Medical Laboratory Management System

Full Stack | Java • Spring Boot • Spring MVC • MySQL • Leaflet / OpenStreetMap *BCA Capstone Project*

- A full-stack, role-based web platform built entirely from scratch that connects patients with medical labs.
 - **Patients:** discover nearby labs, book tests, pay online, track appointment status, and download reports.
 - **Lab Staff:** manage tests, handle appointments, verify payments, and upload result files.
 - **Admin:** verify lab registrations and manage all platform data.
 - **Technical highlights:** Haversine formula for real distance-based lab discovery; Leaflet + OpenStreetMap for interactive map location picking; BCrypt password hashing; role-based session auth; DB-level triggers for appointment slot conflict prevention.

Ecommerce StoreFront

Full Stack | Spring Boot 3 • React • Vite • MySQL

- Full-stack e-commerce platform with 6 product categories, live search, filtering, and price sorting.
 - **Stack:** Spring Boot REST API backend + React/Vite frontend — first hands-on React project.

Realtime Chat App

Backend | Spring Boot • WebSocket • STOMP

- Scalable real-time messaging app using Spring Boot WebSocket and STOMP — hands-on with event-driven architecture.

CryptoTracker

Backend | Spring Boot • CoinGecko REST API

- Tracks live cryptocurrency prices by consuming an external REST API; dynamic data rendering and JSON parsing.

EDUCATION

Patan Multiple Campus, Lalitpur, Nepal

Bachelor in Computer Application (BCA) — Currently 7th Semester

Expected: 2026

Kathmandu, Nepal

SKILLS

- **Backend:** Java, Spring Boot, Spring MVC, Servlet, JSP, REST API design
- **Frontend:** HTML, CSS, Bootstrap, JavaScript, React (actively building)
- **Languages:** Python (OOP), PHP, C#
- **Databases & Tools:** MySQL, Git & GitHub, IntelliJ IDEA, VS Code, Apache Tomcat, XAMPP
- **Exploring:** Python for backend/scripting, AI integration (LLM APIs), modern full-stack patterns
- **Soft Skills:** Fast learner, strong work ethic, team collaboration, ownership mindset

INTERESTS

- Full Stack Development; Backend Architecture; AI & LLM Integration; Open Source; Nepal IT Industry
